

GOLDEN RULES AND SAFETY PRECAUTIONS OF PAINTBALL

1. ALL PLAYERS MUST FILL OUT AND SIGN AN INDEMNITY FORM

To use our field or rent equipment, each person must fill out the Indemnity form. The form is available at www.paintballx.in or at PaintBall X zones.

2. WEAR PROPER GEARS

It is recommended not to wear short or t-shirt during the game. All players should wear long-sleeve shirts and full-length pants. Arms and legs should be fully covered during play. This is the player's responsibility not the owners of the field!

3. FACE MASKS MUST BE WORN AT ALL TIMES ON THE PLAYING FIELD AND IN THE NEUTRAL ZONE

During a game, goggles are to be worn at all times by all persons on the playing field and never to be removed for any reason.

4. BARREL PLUG OR BARREL COVER

All guns should be blocked with a barrel plug or barrel sock. Physical protection from willful paintballs is a must. Unless everyone has a mask on, do not take out barrel plugs.

5. DO NOT SHOOT OUT OF THE PLAYING FIELD, AT THE VIEWING AREA, OUTSIDE OF PLAYING AREA, OR AT ANY OF THE CAMP BUILDINGS OR PERSONAL OR OTHER PERSONS PROPERTY!

6. NO VERBAL ABUSE

Sacrilege or disgrace against other players will not be endured.

7. IT IS STRICTLY BANNED TO BRING OR CONSUME ALCOHOL BEFORE, DURING, OR AFTER THE GAME IN THE PREMISES.

8. SHOOT ON THE CHEST PROTECTOR WHEN DISTANCE IS LESS THAN 15 FEET!

The paintball runs off the barrel with an average speed of 250-300 ft/sec, and this may lead to major injuries. If the distance between two opponent players is less than 15 feet, increase the distance between each other or shoot on the chest protector!

9. NO BLIND SHOOTING

Look at your target. Do not fire if you can't see what you are firing at. Many players are tempted to stick their guns out and fire without looking, but avoid this. Blind firing can lead to unintentionally shooting players who are leaving the field, referees, or viewers.

10. ESTABLISH BOUNDARIES

Before any game begins, be sure to take a walk around the field and clearly designate the boundaries to everyone who plays. A player is not allowed to move together with the barricades. Do not move or rearrange barricades during a game.

11. DEAD ZONE / NEUTRAL ZONE

Make sure everyone knows the location of the dead zone (or staging area) and knows to not shoot in or near it. The dead zone is an area that is off of the field where people go after they are eliminated. The neutral zone is an area that is in or close to the playing area (a safe zone that you can watch or get your equipment ready).

12. GAME OBJECTIVE

Make sure everyone knows what the goal of the game is.

13. TEAMS

Divide up into fair teams. If some people are new to the sport and others are more experienced, divide them up between the teams.

14. START

The game begins when both teams are set at their respective bases. One team calls out that they are ready, the other team responds that they are also ready, and then the referee calls "Game On" and the game begins.

15. HITS

A player is hit if a paintball leaves a solid, nickel-sized mark anywhere on the player's body or equipment. A player is out of the game if he/she is hit by a marking pellet (paintball) and it breaks on him/her, this includes his/her clothing, gun or equipment.

NEVER SHOOT A REFEREE OR GAME OFFICIAL

16. NO PHYSICAL CONTACT

Players must not touch another player or his/her equipment at any time. No physical interaction whatsoever is allowed between players.

17. PAINT CHECKS

If you think you might have been hit but can't tell for sure (such as if your back was hit, but you can't tell if the ball broke), you can call a paint check.

18. WALKING OFF THE FIELD AFTER YOU ARE HIT

When a player is hit, they must then raise their hand over their head, shout that they are hit, and then quickly leave the field to the dead or neutral zone. This movement is only allowed if the player is eliminated, or in a case of emergency. An eliminated player cannot shoot while walking out of the field.

19. VICTORY

When one team has completed the necessary objectives, all players still on the field should be notified. Do not remove masks until barrel plugs or barrel covers have been placed on all loaded guns. Never leave your paintball equipment unattended between games and always lock it up during games.
